SUMMARY

Information Engineering student at Universitas Gadjah Mada building backend systems, AI products, and robotics software: REST APIs (FastAPI, NestJS), web apps (React, Next.js), and a YOLOv8 pipeline for a national 3rd-place ASV team.

EDUCATION

Universitas Gadjah Mada
Bachelor of Engineering in Information Engineering

Yogyakarta, Indonesia
Jul 2024 – Expected 2028

EXPERIENCE

Software Programmer **Dec 2025 – Present**
Gamantaray UGM (Autonomous Surface Vessel Team) *Yogyakarta, Indonesia*

- Built the ASV's object detection pipeline end to end: manually annotated a custom dataset of 3,600+ objects and trained a YOLOv8 model (Ultralytics), achieving 0.98 mAP@0.5 and 0.77 mAP@0.5:0.95 with 0.99 precision and recall
- Deployed the model with OpenVINO on edge hardware (Intel NUC and Raspberry Pi), sustaining real-time inference at 15–20 FPS; the team won 3rd place at Kontes Kapal Indonesia (KKI) 2026
- Built the mission monitoring dashboard (Next.js, Leaflet): heading-up rotating map with live GPS, speed, course over ground and camera feeds over Supabase Realtime

Hacker (Backend Developer) **Dec 2025 – Present**
Google Developer Group on Campus UGM *Yogyakarta, Indonesia*

- Built KosCheck's boarding house fraud-detection backend: an async FastAPI service combining rules with LLM reasoning
- Integrated Gemini multimodal AI, Nominatim (OpenStreetMap), and PyCryptodome to cross-check listings in real time
- Reached 100% recall on the evaluation set with 0–100 risk scoring

Website Developer, HumIT Division **May 2025 – Aug 2025**
PIONIR Kesatria UGM *Yogyakarta, Indonesia*

- Built a responsive event website with Next.js, React, and Tailwind CSS, serving 500+ users during the event
- Developed reusable interactive UI components and managed version control with Git

PROJECTS

AI Recruitment Platform | *NestJS, Prisma, PostgreSQL, Gemini 2.5 Flash, Supabase*

- Engineered a recruitment REST API with NestJS, Prisma ORM, and PostgreSQL with role-based access control (RBAC)
- Automated resume screening with Gemini 2.5 Flash and PDF parsing, scoring candidate skills against job requirements
- Implemented JWT and Google OAuth 2.0 authentication and file storage via Supabase

AI Summarization Tool | *React, Tailwind CSS, DeepSeek, OpenAI GPT*

- Built a web platform that uses LLMs to condense long articles and documents into concise, actionable summaries

LEADERSHIP & ORGANIZATIONAL EXPERIENCE

Workshop Division Staff **Jan 2025 – Present**
KMTETI (Electrical Engineering & IT Student Association), FT UGM *Yogyakarta, Indonesia*

- Organized training sessions and technical bootcamps supporting academic and non-academic learning

CTF Technical Staff **Oct 2025 – May 2026**
FindIT! UGM *Yogyakarta, Indonesia*

- Prepared Capture The Flag (CTF) challenges and coordinated technical operations during the competition

Robotics Technical Staff **Oct 2024 – Jun 2025**
Technocorner UGM *Yogyakarta, Indonesia*

- Managed the Line Follower category of a national-level robotics competition, from technical preparation to matches

Human Resources Staff, Misa Kampus UGM **Sep 2024 – Feb 2026**
Logistics and Equipment Division Staff, FindIT! UGM **Oct 2024 – May 2025**

TECHNICAL SKILLS

Languages: Python, Go, JavaScript, TypeScript, C++, HTML/CSS, SQL

Frameworks: FastAPI, NestJS, React, Next.js, Tailwind CSS, ROS 2

Databases & DevOps: PostgreSQL, MongoDB, Prisma ORM, Firestore, Docker, GitHub Actions (CI/CD), Nginx, Linux, Railway, Vercel, Supabase

AI & Tools: YOLOv8 (Ultralytics), OpenVINO, Computer Vision, Google Gemini API, LLM Integration, Git, JWT, OAuth 2.0, Raspberry Pi, Intel NUC

Spoken Languages: Indonesian (Native), English (Professional Working Proficiency)

AWARDS & CERTIFICATIONS

3rd Place, Kontes Kapal Indonesia (KKI) 2026 – Autonomous Surface Vessel, with Gamantaray UGM

Silver Medal, International Science and Engineering Competition (ISTEC) 2023 – Life Science Category

UKBI (Indonesian Language Proficiency Test): score 726, rated *Istimewa* (Excellent)
